

Naticor™

Item #00390- A bottle of 90 infused vegetable capsules
Item #00380- A bottle of 180 infused vegetable capsules
Item #00300- A bottle of 300 infused vegetable capsules

Infused Naticor™ Formula Redefines the Battle Against Fibrin and Promotes a Healthy Circulatory System

Promote a healthy circulatory system • Fight the formation of fibrin • Cleanse the blood of debris

Summary:

Naticor™ — *adjective*, **nat-i-cor**: describes what just may be the most effective, targeted, fibrin fighter available anywhere. Naticor™ contains only active ingredients captured in a vegetable capsule. Its formula consists of five extra strength proteolytic enzymes—Nattokinase, Serrapeptase, G+ NPH™, G+ pro 4.0™ and G+ pro AP 3.0™—combined with R(+) lipoic, rutoside and a unique mineral matrix to provide you with a product you can trust.*

Naticor™ fibrin fighter contains the five extra strength proteolytic or “protein digesting” enzymes, Nattokinase, Serrapeptase, and the G+ Protease Blend (which contains three additional protease), that work together with R+ lipoic acid, Rutoside and a unique mineral matrix, which when combined work systematically to combat the formation of fibrin throughout the body, providing you with a product that you can truly count on.*

Naticor™ is designed to support and protect your entire body from the ravaging effects of fibrin. Fibrin can build up in our cardiovascular system, in our organs and throughout our muscle tissue. It may manifest itself in many unhealthy and undesirable ailments and as we age the effects of this potential hazard become much more apparent. Until now... Until Naticor™.*

Naticor™ is innovative and is the standard by which all fibrin degradation formulations should be compared. It may promote increased fibrinolysis, or clot breakdown, and is widely regarded as a premier fibrin fighter that promotes healthy aging.*

Naticor™ sets itself apart from all other products in its class as it uses only the most potent form of Nattokinase “NSK-SD”. Don’t settle for inferior imitations. This form of Nattokinase is the most researched and contains per gram the highest activity level of any Nattokinase available in the United States as a dietary supplement. Naticor™ is also the only product in the world that contains both Nattokinase NSK-SD and Serrapeptase.

At the same time we think it’s important for you to know that Generation+® is the only company to have taken several monumental steps into the future by enhancing all of our formulations with the process of bio-energy infusion. This process supports the objective of our products with the infusion of specific, activated subatomic energies.

Naticor™ promotes the reduction of fibrin and maintains a healthy circulatory system without the use of any unwanted chemicals to obstruct, inhibit, or in any other way negatively affect the results you deserve. We use specialized manufacturing equipment and very carefully select density specific active ingredients in the formulation process. This allows us to provide you with consistency in batch manufacturing without compromising Naticor™ with the use of excipients or “other ingredients” that have at best, **NO PROVEN HEALTH BENEFITS**.

Who may benefit:

Naticor™ redefines the battle against fibrin and circulatory health protocols and may be recommended for such. We do not recommend this product for anyone currently taking anticoagulants.

Recommended usage:

Two Week Loading Phase/Therapeutic Dose:

Three (3) vegetable capsules, with at least eight (8) fluid ounces of water three times daily, 45-60 minutes away from large meals. For best results, take three capsules at bedtime, three capsules first thing in the morning, and three capsules in the middle of the day. All enzymes have a half-life so its important to administer your doses three separate times daily in lieu of taking all of your daily doses once a day.

Maintenance dosage:

One (1) vegetable capsule, with at least eight (8) fluid ounces of water three times daily, 45-60 minutes away from large meals. For best results, take one capsule at bedtime, one capsule first thing in the morning, and one capsule in the middle the day. All enzymes have a half-life so its important to administer your doses three separate times daily in lieu of taking all of your daily doses once a day.

Dosage Form: Size 0, vegetable capsule

Ingredients:

Calcium (as calcium citrate).....	150 mg
Magnesium (as magnesium citrate).....	75 mg
Zinc (as zinc methionate).....	9 mg
Naticor™ Proprietary Blend.....	390 mg
Nattokinase NSK-SD 2160 FU	
R(+) lipoic acid	
G+ Protease Blend	
Rutoside (Sophora japonica)	
Serrapeptase	

Other Ingredients: Vegetable Capsule

KEEP OUT OF REACH OF CHILDREN

**AS IS WITH ANY DIETARY SUPPLEMENT
PLEASE CONSULT YOUR PHYSICIAN PRIOR
TO USE**

WARNING: Consult your health care provider prior to taking this product if you currently take any type of blood thinners. Pregnant or lactating women should consult a doctor before using this or any other product. Insulin dependent diabetics must consult their health care provider prior to the use of this product.

**STORE IN A COOL, DRY PLACE
WITH LID TIGHTLY CLOSED**

Naticor™ Defined A-Z

Atherosclerosis — *noun*, ath-ero-scle-ro-sis: a form of arteriosclerosis characterized by deposits in and fibrosis of the inner layer of the arteries causing a hardening which may restrict the flow of blood to the heart.*

Biker — *noun*, bik-er: an individual more suited for a battle against a rival gang than a battle against fibrin. He was placed in this specification sheet as a prop to add a little humor because humor heals. This biker's gang loves Naticor™ and they suggest that you don't forget to take yours.

Calcium — *noun*, cal-ci-um: a silver-white bivalent metallic element of the alkaline-earth group. A mineral which may support normal cardiovascular health by maintaining a regular heartbeat, and promoting proper blood flow. Calcium may also maintain nerve and muscle health.*

Circulatory system — *noun*, cir-cu-la-to-ry sys-tem: the system of blood, blood vessels, lymphatics, and heart concerned with the circulation of the blood and lymph. Naticor™ promotes overall circulatory health.*

Excipient — *noun*, ex-cip-i-ent: we do not use any "other ingredients" in this product. That means that you are provided an exceptional, excipient free formulation that gets right to the heart of healing. There are simply no unwanted chemicals in Naticor™ to obstruct, inhibit, or in any other way negatively affect the results our customers have grown to expect.*

Enzyme — *noun*, en-zyme: any of numerous complex proteins that are produced by living cells and catalyze specific biochemical reactions.

Fibrin — *noun*, fi-brin: a white insoluble fibrous protein formed from fibrinogen by the action of thrombin especially in the clotting of blood. It has the ability to build up in our cardiovascular system, in our organs and throughout our muscle tissue. It may manifest itself in many unhealthy and undesirable ailments and as we age the effects of this potential hazard become much more apparent. Naticor™ fights fibrin.*

G+ Protease — *noun*, g-plus pro-te-ase: any of a number of enzymes that hydrolyze proteins. Generation+® manufactures three proprietary enzymes specifically designed to activate at wider pH and temperature ranges thereby more effectively combating the formation of fibrin.*

Generation Plus Inc. — *noun*, gen-er-a-tion plus, inc: the manufacturer of Naticor™ is a company founded on the commitment to raise the public's awareness of efficacious, complimentary solutions and natural medicines which preserve health and extend the lives of our fellow man.

Infuse — *transitive verb*, in-fuse: to cause to be permeated with something (as a principle or quality) that alters usually for the better. A mean to introduce one thing into another so as to affect it throughout. Infuse implies a pouring in of something that gives new life or significance. We have mapped the energies emitted by the Naticor™ formula and infused those same energies back into itself. Additionally we have selected other specific energy patterns from L-arginine, a unique Asian herb formula and a specific energetic formula chosen to support overall well being and to promote the overall harmonized effect of all Naticor™ ingredients, furthering our enhancement strategy.*

Magnesium — *noun*, mag-ne-sium: a silver-white, metallic element that occurs abundantly in nature. It is a mineral and may alleviate the symptoms of and reduce the risk of hypertension (high blood pressure), arrhythmia, angina pain, and high LDL cholesterol levels and may protect against fatty deposits in arteries.*

Naticor™ — *noun*, nat-i-cor: describing a targeted, all natural, fibrin fighter containing only active ingredients captured in a vegetable capsule. Naticor contains five extra strength proteolytic enzymes, Nattokinase, Serrapeptase, G+ NPH™, G+ pro 4.0™ and G+ pro AP 3.0™ combined with R(+) lipoic acid, rutoside and a unique mineral matrix to provide you with a product that you can truly count on.*

Natto — *noun*, natt-o: a unique Japanese food produced through the fermentation of soy beans. It has been a food source in Japan since the Edo period (1603-1868) but is enjoying unprecedented popularity as more and more people turn to it for its health-promoting properties.

Nattokinase — *noun*, natt-o-kin-ase: recognized as the most potent fibrin fighting enzyme available today and is the fibrinolytic enzyme found in the Japanese fermented food "natto". Our brand of Nattokinase, NSK-SD has a potency matched by no other enzyme. NSK-SD originates from the microorganism, Bacillus and is comparatively stable in varying temperature and pH. No question about it, Nattokinase fits fibrin.*

Platinum Club — *noun*, pla-ti-num club: The Platinum Club of Generation Plus, Inc is a group of volunteers made up of doctors, alternative care providers, and others whose lives have been touched by Generation Plus products.

R+ Lipoic Acid — *noun*, r-plus li-po-ic ac-id: of the two isomers of lipoic acid present in conventional supplements, R+ is the natural form. S(-)-lipoic acid is a purely artificial molecule. It is produced as a by-product in the normal method of producing commercial lipoic acid. Conventional lipoic acid supplements use a 1:1 ratio of the R+ and S-isomers. Naticor™ offers only the natural R+ isomer for a truly "natural" and more beneficial ingredient. R+LA is a component of several human enzyme systems. This hard working nutrient impedes fat production by redirecting calories to be used as energy. R+LA may also promote healthy blood flow to nerves, which may promote normal transmission of nerve impulses. R+LA has the unique ability to directly recycle, reactivate, and extend the lifespan of other antioxidants such as vitamin C, vitamin E, Glutathione, and Coenzyme Q10, creating an antioxidant framework that is second to none.*

Saphora Japonica — *noun*, a-phor-a ja-pon-i-ca: a form of Rutoside, is critical for chelating free iron after trauma and may promote healthy circulation. It has the unique ability to improve capillaries and veins and it supports the regeneration capacity of human body tissues. Saphora Japonica is also a powerful antioxidant that fights free radicals and seems to have a protective effect against syndromes that lower the body's oxygen supply.*

Serrapeptase — *noun*, serra-pep-tase: a super protein digesting enzyme which breaks down "non living" matter in the human body. This action may promote a reduction in levels of dead tissue promoting smoother healthier flowing blood. Serrapeptase fights fibrin.*

Testimonial — *adjective*, tes-ti-mo-ni-al: a statement testifying to benefits received. We are always in search of testimonials. If you have a great story to tell please telephone us directly at 877-255-8482.

Thrombosis — *noun*, throm-bo-sis: the formation or presence of a blood clot within a blood vessel.

Value — *noun*, val-ue: A fair exchange of money for goods. Naticor™ is a great value.

Water — *noun*, wa-ter: a major constituent of all living matter and when it is pure it is odorless and tasteless. Drink at least 8 fl. oz of pure water with each serving of Naticor™. Water must be available throughout our GI tract. Without proper amounts of water many biochemical reactions will not be performed.

Zinc — *noun*, zinc: a bluish white crystalline metallic element of low to intermediate hardness. Zinc can aid in injury healing and immunity. Zinc is a component of many enzymes and thus, is involved in most metabolic processes. The human body on average contains no more than 3 grams of zinc, but this tiny amount ensures the proper functioning of more than many enzymes. NATICOR—THE NEW STANDARD IN CIRCULATORY HEALTH.
